interpack 2020

High throughput, low energy consumption: AVENTUS to showcase high-performance packaging systems at interpack

- Joint venture for a broad range of solutions
- Powerful and low-maintenance units for free-flowing bulk materials
- Solutions for agriculture as well as the chemicals, salts, fertilisers pet food and animal feed industries

Warendorf (Germany), February 25, 2020 – Combined expertise at interpack: AVENTUS GmbH & Co. KG will be presenting its comprehensive range of packaging solutions at the leading trade fair for the packaging industry for the first time on 7–13 May. The joint venture founded in 2018 between the global market leaders HAVER & BOECKER and WINDMÖLLER & HÖLSCHER will be presenting, among other machines, a particularly powerful system for free-flowing bulk materials. Apart from that, AVENTUS will be showcasing an energy-efficient maintenance-friendly palletiser at Booth C42 in Hall 15.

Global market leaders HAVER & BOECKER (H&B) and WINDMÖLLER & HÖLSCHER (W&H) have kept a solid name in the packaging industry for decades. The two packaging equipment specialists founded the joint venture AVENTUS in 2018 in order to combine the expertise of both companies. “We are the intersection between both global market leaders,” says AVENTUS Sales Director Claus Ohlmeyer. “We are responsible for combining, developing and marketing the two companies’ established technologies for filling and packaging free-

flowing bulk materials from one source.” This pooled capability is to benefit customers in agriculture as well as the chemicals, salts, fertilisers, pet food and animal feed industries in a full range of machines and services. AVENTUS will be presenting this range for the first time at its joint booth with W&H at interpack.

A perfect combination of expertise and technology

The trade-fair exhibit will be centred on a particularly powerful packaging machine for free-flowing bulk materials. The system fills up to 2,600 bags at a weight of 25 kilograms per hour. The components are durable against wear, keeping availability high in this packaging solution. The unit also benefits from advanced measuring and cooling systems as well as a complete data management system.

An energy-efficient palletiser with a low carbon footprint is another highlight. The packaging system for open and valve bags from the NEWTEC BAG PALLETIZING subsidiary is also low on maintenance.

Full-service offering for customers

In addition, AVENTUS supplies a variety of services and conversions to help improve lifetime and efficiency in existing H&B and W&H units. Amongst other things, the joint venture will be presenting an improved filling spout promising a significant reduction in unit maintenance for users. The packaging specialist will also be showcasing an optimised dosing unit that promises to bring about a substantial increase in output.

AVENTUS will be exhibiting at interpack on 7–13 May together with WINDMÖLLER & HÖLSCHER at Booth C42, Hall 15. HAVER & BOECKER will also be at the trade fair at Booth A27 in Hall 12.

Filling machine for free-flowing bulk materials:

At interpack AVENTUS will be presenting a particularly powerful packaging machine for free-flowing bulk materials. The system fills up to 2,600 bags at a weight of 25 kilograms per hour.

Palletiser:

The palletizer from NEWTEC BAG PALLETTIZING is energy efficient, has a low CO₂ footprint and is easy to maintain.

Claus Ohlmeyer:

"AVENTUS is the intersection between the two world market leaders HAVER & BOECKER and WINDMÖLLER & HÖLSCHER in the field of packing and palletising technology for free-flowing bulk materials", explains Claus Ohlmeyer, Sales Director at AVENTUS.

About AVENTUS GmbH & Co. KG

The AVENTUS GmbH & Co. KG is a manufacturer of packaging systems for industrial applications with headquarters in Warendorf near Münster in north-western Germany. The joint venture founded in 2018 between the global market leaders HAVER & BOECKER and WINDMÖLLER & HÖLSCHER manufactures and markets filling systems for free-flowing bulk materials alongside palletising and load-securing systems. The comprehensive portfolio from AVENTUS mainly serves agriculture as well as the chemicals, salts, fertilisers, pet food and animal feed industries. The palletiser specialist NEWTEC BAG PALLETIZING is a full subsidiary of AVENTUS.
